The President

June 12-15, 2016

Dear Members of the American Society of Health Economists:

On behalf of the University of Pennsylvania and Philadelphia, welcome! I am delighted that the American Society of Health Economists has chosen us to host its biennial conference. With all that our beautiful urban campus and historic city have to offer, I believe you will find you have chosen well.

We welcome your wisdom and insight as you explore the frontiers of health care and health policy. You could not come at a more crucial time in our nation's efforts to improve the health of its people while carefully stewarding our national resources. You also could not have picked a more auspicious time to come to Penn as your official host, the Leonard Davis Institute of Health Economics (LDI), approaches its 50th anniversary.

LDI embodies and advances Penn's goal of fostering interdisciplinary connection among our 12 Schools as well as our health system. You will experience these rich interconnections by simply walking through our compact and contiguous campus, which is a dynamic workshop of ideas, discovery, and creativity. As you explore, take time to relax in Penn Park, our stunning and sustainable 24-acre green space which serves as a natural bridge to central Philadelphia and our community. Visit the Penn Museum of Archeology and Anthropology, the largest such university museum in the country, to take in our world-class collections and the newly premiered exhibition, "The Golden Age of King Midas," featuring ancient treasures from the Republic of Turkey.

After you've spent the day presenting and discussing cutting-edge research on medical and labor markets, insurance and reimbursement, competition and consumer demand, costs and benefits, and on economic theory and health policy, venture out and enjoy all that Philadelphia has to offer. Whether you seek the very best in cosmopolitan dining, culture and the arts, shopping, or history, Philadelphia will be sure to surprise and delight.

You have my very best wishes for a successful conference and a pleasant stay.

Sincerely

Amy Gutmann

June 2016

Dear American Society of Health Economists:

Welcome to the sixth biennial conference of the American Society of Health Economists. The Leonard Davis Institute of Health Economics at the University of Pennsylvania is proud to host this premier forum for showcasing new ideas and discussing cutting-edge research in health economics and health policy.

Our theme, *New Frontiers in Health Policy and Health Care*, reflects this exciting time for our field. As the dictionary tells us, a *frontier* represents uncharted territory. Whether it refers to a remote piece of land or a new way of thinking, a *frontier* challenges us to explore, to push beyond existing boundaries. Our exciting lineup of plenary speakers is certain to challenge our thinking. Doug Elmendorf, Dean of the Harvard Kennedy School, and Director of the Congressional Budget Office (CBO) during health care reform, will discuss how the work we do can influence health care policy. Our other plenary is a panel on *Bringing Economics and Behavioral Economics to Innovations in Provider Payment Reform* with Ezekiel Emanuel, Meredith Rosenthal, Kevin Volpp, Amol Navathe, and Dana Safran.

We hope that this conference will tap into your inner explorer, and open up new avenues for research and collaboration. There is much to explore within our concurrent sessions with over 500 papers organized by themes ranging from competition to cost-benefit, mental health to maternal health, and insurance to reimbursement. And even the most hardy adventurers must take time to recharge and relax. Take advantage of the many green spaces on Penn's campus and in the city of Philadelphia. Soak in the history, art, and culture that surrounds you. Have fun!

We look forward to a stimulating and productive conference. When 1,000 health economists gather in one place, anything is possible.

Sincerely,

Daniel Polsky

ASHEcon Host Committee Chair

Executive Director, Leonard Davis Institute of Health Economics

I would like to welcome each of you to the Sixth Biennial Conference of the American Society of Health Economists (ASHEcon), hosted by the Leonard Davis Institute of Health Economics at the University of Pennsylvania! The mission of ASHEcon continues to be to promote excellence in health economics research and to provide a forum for emerging ideas and both empirical and theoretical results of health economics research. Historically the biennial conferences are the primary activity through which we achieve this mission. However, since the last meeting, most of you know we have launched our new journal, the *American Journal of Health Economics*. The launch has been a resounding success as we've already received hundreds of your articles. Keep them coming! While we're on the subject, *AJHE* is a great place to consider sending your work after presenting it here at the conference!

We have an even more packed schedule this year. Fifteen concurrent sessions and more than 500 papers will be presented along with over 250 posters. We also have wonderful and insightful plenary sessions planned. We will also be giving awards to recognize the achievements of our most distinguished members of the field (The Victor Fuchs Lifetime Achievement Award) and our newest members of the field (the Student Paper Award), as well as recognizing the contribution of the late great Will Manning with a new award named in his honor. And our President, Mark Pauly, will give his presidential address during the noon hour on Monday.

A motivating principle of ASHEcon is "inclusion." I believe this is accomplished at this conference. Participants range from senior health economists to students, local to international, and come from universities, government, research organizations, and industry. The planning committee has made significant efforts to provide sessions and workshops on a broad range of topics. Everyone will find topics of interest—likely many.

Special thanks go to the Planning Committee chaired by President-Elect Jon Gruber, the Chair of the Local Organizing Committee, Dan Polsky, President Mark Pauly, the scientific committee, the sponsors of this conference listed in this program, the officers, board and volunteers of ASHEcon, and to the University of Pennsylvania for graciously hosting our conference. Many people provided very valuable behind the scenes assistance. We thank the outstanding and tireless work of LDI staff including Jennifer Magazzu, Lissy Madden, Megan Pellegrino, and Nathan Westrup. And of course we thank ASHEcon Associate Director Charmaine Wright for all her work coordinating the many tasks associated with planning and operating a conference of this size.

We hope our 6th Biennial Conference exceeds all of your expectations. Please be sure to fill out the online evaluation to assist us in planning future conferences. And as always, thank you for your support of ASHEcon!

Warm Regards,

Tony Lo Sasso
Executive Director

Welcome to the 6th Biennial Conference of the American Society of Health Economists! As Dean of the Wharton School of the University of Pennsylvania, it gives me great pleasure to have you here. It is fitting that the largest assembly of health economists to date is being held at the country's first business school.

Our founder, Joseph Wharton, had a vision for a business school focusing on rigorous analysis, actionable knowledge and responsible leadership. From this powerful foundation, Wharton has become the foremost research-led business school in the world.

Wharton's vision lives on in the Leonard Davis Institute of Health Economics, which represents one of the earliest efforts to promote collaborative scholarship in health care through formal partnerships among the clinical, management, and social sciences. We are immensely proud of the 50-year history of LDI and its role in producing some of the most prominent health economists in the country.

America's dynamic and demanding health care system requires your research and ingenuity, now more than ever. Your hosts and organizers have planned a conference that reflects the extent of these challenges and the intellectual resources you bring to meeting them.

I encourage you to fully engage in the program and all it has to offer – Joseph Wharton would expect nothing less.

Best Regards,

AWARDS

VICTOR R. FUCHS AWARD: FRANK SLOAN

Frank Sloan is the J. Alexander McMahon Professor of Health Policy and Management and Professor of Economics at Duke University. He is the former Director of the Center for Health Policy, Law and Management at Duke (CHPLM) that originated in 1998. He holds faculty appointments in five departments at Duke, with Economics being his primary appointment. He did his undergraduate work at Oberlin College and received his Ph.D. in economics from Harvard University. Before joining the faculty at Duke in July 1993, he was a research economist at the RAND Corporation and served on the faculties of the University of Florida and Vanderbilt University. He was Chair of the Department of Economics at Vanderbilt from 1986-89. His current research interests include alcohol use and smoking prevention, long-term care, medical malpractice, and cost-effectiveness analyses of medical technologies. He also has a long-standing interest in hospitals, including regulation of hospitals, health care financing, and health manpower. Frank has served on several national advisory public and private groups. He is a member of the Institute of Medicine and was formerly a member of the Physician Payment Review Commission. He is the author of about 300 journal articles and book chapters and has co-authored and coedited about 20 books.

ASHECON MEDAL: NOT AWARDED

WILL MANNING AWARD: JONES, ANDREW M., LOMAS, JAMES, AND RICE, NIGEL. (2015) Healthcare Cost Regressions: Going Beyond the Mean to Estimate the Full Distribution. *Health Economics*, 24: 1192-1212.

Abstract: Understanding the data generating process behind healthcare costs remains a key empirical issue. Although much research to date has focused on the prediction of the conditional mean cost, this can potentially miss important features of the full distribution such as tail probabilities. We conduct a quasi-Monte Carlo experiment using the English National Health Service inpatient data to compare 14 approaches in modelling the distribution of healthcare costs: nine of which are parametric and have commonly been used to fit healthcare costs, and five others are designed specifically to construct a counterfactual distribution. Our results indicate that no one method is clearly dominant and that there is a trade-off between bias and precision of tail probability forecasts. We find that distributional methods demonstrate significant potential, particularly with larger sample sizes where the variability of predictions is reduced. Parametric distributions such as log-normal, generalised gamma and generalised beta of the second kind are found to estimate tail probabilities with high precision but with varying bias depending upon the cost threshold being considered.

STUDENT PAPER AWARDEES: ELENA PRAGER (“Tiered Hospital Networks, Health Care Demand, and Prices”) and JUAN PABLO ATAL (“Lock-in in Dynamic Health Insurance Contracts: Evidence from Chile”)

ELENA PRAGER is an economist interested in issues at the intersection of health economics and industrial organization. Her research focuses on the supply side of the health care market, studying strategic behavior among health insurers and health care providers. Current work examines the interaction of health insurance design, hospital-insurer price negotiations, and provider network formation. Prior to her doctoral studies at the University of Pennsylvania’s Wharton School, Elena graduated with an iBBA in business and economics from York University. This fall, Elena will join Northwestern University’s Kellogg School of Management as an Assistant Professor.

JUAN PABLO ATAL is an applied microeconomist whose research focuses on different aspects of health economics. He is currently studying the workings of long term health insurance, the determinants of team productivity in the emergency department, and the effect of quality regulations on the pharmaceutical market. Prior to earning his PhD in Economics from the University of California at Berkeley, Juan Pablo graduated with a B.S. in Industrial Engineering and an M.A. in Economics from Universidad de Chile, and worked as a research assistant at the Inter-American Development Bank. This fall, he will join the Department of Economics at the University of Pennsylvania.

AWARD INFORMATION

VICTOR R. FUCHS AWARD FOR LIFETIME CONTRIBUTIONS TO THE FIELD OF HEALTH ECONOMICS

Description: The Victor R. Fuchs Award for Lifetime Contributions to the Field of Health Economics is awarded biennially to an economist who has made significant lifetime contributions to the field of health economics.

Eligibility: Recipients must hold their primary appointment (or be emeritus or retired) at an institution based in the United States, but need not be United States citizens. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The criteria are scholarly contributions to health economics, primarily through publications in economics journals. Contributions may be theoretical, empirical, or methodological.

ASHECON MEDAL

Description: The ASHEcon Medal is awarded biennially to the economist age 40 or under who has made the most significant contributions to the field of health economics.

Eligibility: Recipients must be age 40 or younger on January 1 of the year of the ASHEcon conference. Recipients must hold their primary appointment in an American institution, but need not be citizens of the United States. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The criteria are scholarly contributions to health economics, primarily through publications in economics journals. Contributions may be theoretical, empirical, or methodological.

THE WILLARD G. MANNING MEMORIAL AWARD FOR THE BEST RESEARCH IN HEALTH ECONOMETRICS

Description: This award memorializes Will Manning's contributions to the development and application of econometric methods in health economics by recognizing the best published health economics research in econometric methodology or econometric application.

Eligibility: Papers must have been published in a peer-reviewed journal in the two calendar years prior to each ASHEcon Conference. Self-nominations are encouraged.

Criteria: The award is intended to recognize the development of econometric methods used in health economics, the application of existing frontier econometric methods to important problems in health economics, or both.

STUDENT PAPER AWARD

Description: The ASHEcon Student Paper Award honors the student who wrote the best sole-authored paper.

Eligibility: Recipients must be current Ph.D. students or have received their Ph.D. from an American institution. The paper must be sole authored. The paper may be published (or forthcoming) in a peer-reviewed journal. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The Awards Committee will select the paper that makes the greatest contribution to health economics. The paper's contributions may be theoretical, empirical, or methodological.

SCHOLARSHIPS FOR WOMEN AND UNDER-REPRESENTED MINORITIES

FROM THE NATIONAL INSTITUTE ON AGING (NIA) TO ATTEND THE 6TH BIENNIAL CONFERENCE OF THE AMERICAN SOCIETY OF HEALTH ECONOMISTS

ASHEcon would like to honor nine recipients this year of the National Institutes of Health Travel Fellowships for Women and Under-Represented Minorities* (\$1000 each)

INGA BONFRER, post-doctoral fellow, Harvard University. Primary research interests include the effectiveness of pay-for-performance.

COLIN CANNONIER, assistant professor, Belmont University. Primary research interests include the impact of sex and HIV education policies on adolescent behaviors and the associated health implications.

VILSA CURTO, post-doctoral fellow, MIT. Primary research interests include public vs private provision of health insurance: the case of Medicare Advantage.

AUSMITA GHOSH, doctoral student, Indiana University. Primary research interests include relationship between Medicare payment policies and provider behavior; health reform effects on utilization of care among vulnerable populations.

MAYA HANNA, doctoral student, University of Maryland. Primary research interests include modeling costs of health care resource use based on diagnosis and treatment variations.

LAURA HENKHAUS, doctoral student, USC. Primary research interests include brand vs generic drug choice for chronic condition management.

SAPNA KAUL, assistant professor, University of Texas Medical Branch. Primary research interests include cost of care, willingness to pay, and quality of life in cancer care.

MONIKA LOPEZ, assistant professor, Connecticut College. Primary research interests include health disparities; how families take care of one another throughout generations and despite geographic distance; intergenerational transfers.

ANGELICA MEINHOFER, doctoral student, Brown University. Primary research interests include the role of drug control policies on prescription drug availability, abuse and its associated social costs.

**Under-represented minorities in health economics are defined as African-American, Hispanic, or Native Americans; Award winners had to be female and/or one of these under-represented minorities.*

MEDICAL SERVICES AND EMERGENCY NUMBERS

The University of Pennsylvania's department of Public Safety (DPS) provides an active presence on Campus and in the surrounding community. It is important to remember that UPenn's campus is in Philadelphia, a vibrant, diverse, modern city with all the benefits and issues of an urban lifestyle. Please use general precaution and be aware of your surroundings when you explore the area. For more information and general safety tips, please visit the DPS website at <https://www.publicsafety.upenn.edu/>.

IN THE EVENT OF AN EMERGENCY

All students, faculty, staff and visitors are encouraged to report any emergency situation, crime or suspicious behavior to DPS. Crimes in progress, suspicious or threatening behavior, or other emergencies can be reported to DPS at (215)-573-3333 or 511 from a campus phone. Non-emergencies can be reported to DPS at (215) 898-7297.

PLENARIES

SUNDAY, JUNE 12, 2016

5:30 PM - 7:00 PM ANNENBERG CENTER, HAROLD L. ZELLERBACH THEATRE

OPENING PLENARY: BRINGING ECONOMICS AND BEHAVIORAL ECONOMICS TO INNOVATIONS IN PROVIDER PAYMENT REFORM

Presiding: Kevin G. Volpp, University of Pennsylvania

KEVIN VOLPP, M.D., PH.D.

Dr. Volpp is the founding Director of the Leonard Davis Institute Center for Health Incentives and Behavioral Economics, one of two NIH-funded Centers on Behavioral Economics and Health in the United States. He is also a Professor of Medicine and Vice Chairman for Health Policy of the Department of Medical Ethics and Policy at the Perelman School of Medicine, a Professor of Health Care Management at the Wharton School, and one of two Directors of the University of Pennsylvania CDC Prevention Research Center. Dr. Volpp's research on the impact of financial and organizational incentives on health behavior and health outcomes work has been recognized by numerous awards including the Alice S. Hersh Award from AcademyHealth; the British Medical Journal Group Award for translating Research into Practice; the outstanding paper of the year from multiple research societies; a Presidential Early Career Award for Scientists and Engineers (PECASE); the Association for Clinical and Translational Science Distinguished Investigator Award for Career Achievement and Contributions to Clinical and Translational Science; and the Matilda White Riley Award for outstanding contributions to social and behavioral science research from NIH. Volpp did his medical training at the University of Pennsylvania and Brigham and Women's hospital and his training in Economics at the Wharton School. He is a board-certified general internist and practicing physician at the Philadelphia VA Medical Center.

EZEKIEL J. EMANUEL, M.D., PH.D.

Ezekiel J. Emanuel is the Vice Provost for Global Initiatives and Chair of Medical Ethics and Health Policy at the University of Pennsylvania. He was the founding Chair of the Department of Bioethics at the National Institutes of Health and has served as special advisor for the Office of Management and Budget in the White House. Dr. Emanuel received his M.D. from Harvard Medical School and Ph.D. in political philosophy from Harvard University.

AMOL NAVATHE, M.D., PH.D.

Amol Navathe, MD, Ph.D, is an Assistant Professor of Health Policy and Medicine, University of Pennsylvania. Prior to joining the University of Pennsylvania, Dr. Navathe served as Managing Director, Healthcare for the firm Navigant where he led the Academic Medical Center, Value Transformation, and Analytic Services practices. Dr. Navathe is a practicing physician, health economist and engineer with expertise in delivery transformation and policy design. His work has focused on two core areas of (1) provider economic behavior including incentive design and behavioral economics and (2) applications of informatics to address health services research questions. His work in advanced health data analytics and technology to improve healthcare delivery has been implemented at numerous large health systems. He has also applied his skills to federal policy for health care evidence development and data infrastructure. Dr. Navathe completed his medical training at the University of Pennsylvania School of Medicine, post-graduate medical training at the Brigham and Women's Hospital, Harvard Medical School, and obtained his Ph.D. in Health Care Management and Economics at The Wharton School, University of Pennsylvania.

MEREDITH ROSENTHAL, PH.D.

Meredith Rosenthal, PhD, is Professor of Health Economics and Policy and the Associate Dean of Diversity at the Harvard T.H. Chan School of Public Health. She is a member of the Massachusetts Public Health Council and an elected board chair of the Massachusetts Health Quality Partners. Dr. Rosenthal's research focuses primarily on policies that will help slow the growth in healthcare spending. These efforts include changes in payment incentives, benefit design, and the provision of information and behavioral "nudges" to both patients and providers. Her research has influenced the design of provider payment systems in both the public and private sectors. She has advised federal and state policymakers in healthcare payment policy and implementation. She has also testified in Congressional hearings on direct-to-consumer advertising of prescription drugs and pay-for-performance and in legislative hearings in California and Massachusetts concerning healthcare provider payment and benefit design policies. During the 2008 presidential campaign and post-election transition, she provided policy analyses to Barack Obama's healthcare team regarding opportunities for Medicare payment reform, pay for performance, and cost control. Her work has been published in the New England Journal of Medicine, the Journal of the American Medical Association, Health Affairs, and numerous other peer-reviewed journals.

DANA GELB SAFRAN, SC.D.

*Chief Performance Measurement & Improvement Officer and Senior Vice President, Enterprise Analytics
Performance Measurement & Improvement, Blue Cross Blue Shield of Massachusetts (BCBSMA)
Associate Professor of Medicine, Tufts University School of Medicine*

Dr. Safran is Chief Performance Measurement and Improvement Officer and Senior Vice President, Enterprise Analytics at Blue Cross Blue Shield of Massachusetts (BCBSMA). In this role, she leads the company's initiatives to measure and improve healthcare quality, safety and outcomes. Dr. Safran was among the lead developers of the BCBSMA Alternative Quality Contract (AQC), a provider contract model launched in 2009 with the twin goals of improving quality and outcomes while significantly slowing spending growth. Dr. Safran also retains an active academic practice, as a faculty member in the Department of Medicine at Tufts University School of Medicine, and has authored more than 75 peer-reviewed articles. She is widely recognized as having contributed to the empirical basis for our nation's push toward a more patient-centered health care system – and for developing measures of patient care experiences that are now used nationwide, accepted as a national standard for this area of measurement, and used by the Medical Boards as part of their recertification process for physicians. Dr. Safran's advisory roles on national and local quality measurement include work with the Office of the National Coordinator (ONC), the Centers for Medicare and Medicaid Services (CMS), the National Quality Forum (NQF), the American Board of Internal Medicine (ABIM), the National Committee for Quality Assurance (NCQA), and the Massachusetts State Quality Advisory Council (SQAC). She serves on the Boards of Directors for a number of charitable and academic organizations. Dr. Safran earned her Master and Doctor of Science degrees in Health Policy from the Harvard School of Public Health. Dr. Safran is currently co-chairing the Population Based Payment workgroup of Health Care Payment Learning and Action Network (LAN).

12:00 PM - 1:00 PM ANNENBERG CENTER, HAROLD L. ZELLERBACH THEATRE

PRESIDENTIAL ADDRESS, MARK PAULY: SUBSIDIES, EXTERNALITIES, AND MORAL HAZARD: SHOULD LOWER INCOME PEOPLE BE ALLOWED TO BUY INSURANCE WITH HIGH COST SHARING?

Presiding: Mark Pauly, PhD, Wharton School, University of Pennsylvania

MARK V. PAULY, PH.D.

Mark V. Pauly currently holds the position of Bendheim Professor in the Department of Health Care Management at the Wharton School of the University of Pennsylvania. He received the Ph.D. in Economics from the University of Virginia. He is Professor of Health Care Management and Professor of Business Economics and Public Policy at the Wharton School, Professor of Medical Ethics and Health Policy at the Perelman School of Medicine, and Professor of Economics in the School of Arts and Sciences at the University of Pennsylvania. He is a former commissioner on the Physician Payment Review Commission and an active member of the Institute of Medicine. One of the nation's leading health economists, he has made significant contributions to the fields of medical economics and health insurance. His classic study on the economics of moral hazard was the first to point out how health insurance

coverage may affect patients' use of medical services. Subsequent work, both theoretical and empirical, has explored the impact of conventional insurance coverage on preventive care, on outpatient care, and on prescription drug use in managed care. His interests in health policy deal with ways to reduce the number of uninsured through tax credits for public and private insurance, and appropriate design for Medicare in a budget-constrained environment. He is currently studying the impacts of health care reform and the Affordable Care Act. He has explored the influences that determine whether insurance coverage is available and, through several cost effectiveness studies, the influence of medical care and health practices on health outcomes and cost. Mark is a co-editor-in-chief of the International Journal of Health Economics and Management and an associate editor of the Journal of Risk and Uncertainty. He has served on Institute of Medicine panels on public accountability for health insurers under Medicare and on improving the financing of vaccines. He currently serves as President of the American Society of Health Economists (ASHEcon).

ASHECON AWARDS AND PLENARY SPEAKER DOUGLAS ELMENDORF: THE INFLUENCE OF RESEARCH ON HEALTH CARE POLICY

DOUGLAS W. ELMENDORF, PH.D.

Douglas W. Elmendorf is Dean of the John F. Kennedy School of Government at Harvard University, where he also serves as the Don K. Price Professor of Public Policy. Doug Elmendorf served as the director of the Congressional Budget Office from January 2009 through March 2015. Prior to joining CBO, he was at Brookings, where he was a senior fellow, the Edward M. Bernstein Scholar, and the director of The Hamilton Project. He was previously an assistant professor at Harvard University, a principal analyst at CBO, a senior economist at the White House's Council of Economic Advisers, a deputy assistant secretary for economic policy at the Treasury Department, and an assistant director of the Division of Research and Statistics at the Federal Reserve Board. In those positions, he worked on budget policy, health care issues, the macroeconomic effects of fiscal policy, Social Security, income security programs, financial markets, macroeconomic analysis and forecasting, and other topics. Doug Elmendorf earned his Ph.D. and A.M. in economics from Harvard University, where he was a National Science Foundation graduate fellow, and his A.B. summa cum laude from Princeton University.

CTI CLINICAL
TRIAL &
CONSULTING

Where Life-changing Therapies Turn First™

Join the CTI HEOR Team

The CTI HEOR team of experts gather real world evidence of a product's value in clinical development and commercial programs. Understanding the end results of particular health care practices or of a certain product may provide evidence about benefits, risks, and results of treatments for key stakeholders: clinicians, patients, payers and hospitals. For healthcare managers and purchasers, it can identify effective strategies to improve quality and value of care. Industry companies can also gain valuable information for product development, reimbursement, and marketing strategies.

CTI Clinical Trial and Consulting Services is a global, privately held, full-service contract research organization (CRO), delivering a complete spectrum of clinical trial and consulting services throughout the lifecycle of development, from concept to commercialization. CTI's focused therapeutic approach provides clinical and disease area expertise in rare diseases, regenerative medicine/gene therapy, immunology, transplantation, nephrology, hematology/oncology, neurology, infectious diseases, hepatology, cardiopulmonary, and pediatric populations.

Health Economics and Health Policy at Vanderbilt

Vanderbilt University is committed to building its health economics and health policy programs through new faculty hires (four tenured and five tenure-track faculty hires in health economics, health policy, and health services research in the past three years) and innovative university-wide initiatives.

Come Learn at Vanderbilt

- The Department of Health Policy in the Vanderbilt School of Medicine offers an MPH degree with a health policy track.
- The Department of Economics offers a PhD field in health economics.
- Vanderbilt Law School offers a Law and Economics JD-PhD program with a focus on health law and policy.
- Owen Graduate School of Management offers a Health Care MBA program.

Come Work at Vanderbilt

- The Department of Health Policy is recruiting faculty to establish a PhD in health policy, especially in the following areas: decision science/cost-effectiveness analysis; mental health; methods; and child health.
- The Owen Graduate School of Management is currently recruiting for an endowed chair in health care.

Inquiries about these positions can be made to:
healthpolicychair@vanderbilt.edu.

Come Visit Vanderbilt and Music City

We are scheduled to host the 2016 Annual Health Economics Conference (tentatively October 13–14, 2016) and the 2017 Southeastern Health Economics Study Group Conference (dates TBA).

We hope you will join us for one of these exciting conferences, and we invite you to find out more about health economics and health policy at Vanderbilt by talking with one of our many faculty and graduate students who will be at the 2016 ASHEcon conference.

*Welcome,
ASHEcon,*

to where it all began

Nearly 50 years ago, in the wake of the passage of Medicare and Medicaid, a new institute arose, joining two important traditions at the University of Pennsylvania: medicine and management. Since then, the Leonard Davis Institute of Health Economics has built bridges across all 12 Penn schools and the Children's Hospital of Philadelphia, uniting more than 230 scholars with the singular mission of improving our nation's health care system through rigorous research and data-driven policy.
